

**Lesson 3**

***Student Handout 3.5—Earth’s Rivers: Highways into the Continents***

Identify each of the major rivers shown on the map and write its name in the correct box.

What is a watershed? Name three rivers that have watersheds draining large parts of each continent.

What makes a river navigable? What prevents a river from being navigable?

Name one major city on each of the rivers you labeled on the map.

River	City	River	City
